EMPLOYMENT

2017 - 2019

FAST Enterprises – Implementation Consultant

- I debugged and built solutions for issues that arose in the active and ever-changing environment of tax/DMV software.
- I worked primarily with Vb.net, SQL Server, and Fast's custom front end software to build solutions. I worked with large amounts of data, with efficiency being at the forefront of my priorities.
- For one of my larger projects I spent several months designing, developing, and testing a taxation interest-calculator, which allowed auditors to create hypothetical transaction scenarios that they could then forecast years into the future with reliability and accuracy.

PERSONAL PROGRAMMING PROJECTS

Personal Programming Projects

- **Deep Thought Helper**
  - In order to further my knowledge of creating automated processes I created a web scraping site built with Nodejs and Python. Check it out here: https://deep-thought-helper.herokuapp.com/
- **Mosaic Third Sector Consulting**
  - Small business site I created for a non-profit. I took on the project in order to improve my front-end design skills such as CSS, HTML, and JavaScript. Here's the site: http://www.mosaic3sc.com

SKILLS

Programming Experience

- OO Principles, Design Patterns, Version Control, Algorithms
- Primary Tools:
  - SQL Server – 5 years experience (3 from education, 2 from industry)
  - Vb.Net – 2 years experience (2 from industry)
  - Java – 4 years experience (4 from education)
- Secondary Tools: Nodejs, Python, Linux Command Line, C, MongoDb, Html, CSS

EDUCATION

2013 - 2017

Eastern Washington University

- Bachelor's in computer science
- Cumulative GPA of 3.54; Computer Science/Math Course GPA - 3.78
